

Veeva CRM Maintenance Release Notes -- 181.11.0

Approved Email

Online: The incorrect account ID type was being processed when an Approved Email was sent. This has been fixed. (CRM - 144585)

Consent Capture

iPad: Consent lines were opted in when the Account did not have a Multichannel consent record. This has been fixed. (CRM - 145155)

Engage Meeting

Online: The Send Invitation button was not visible when the associated Approved Documents were part of a product group. This has been fixed. (CRM - 144270)

Events Management

Online: Hyperlinks in Formula fields did not display correctly. This has been fixed. (CRM - 144106)

Online: Attendee reconciliation did not work correctly when queries were large. This has been fixed. (CRM - 142456)

HTML Report

Windows 8 and 10: When a user's locale was set to Germany, "NaN" displayed as the Consumer Price for some products. This has been fixed. (CRM - 144000)

iPad, Windows 8 and 10: Order data only displayed for products included in a contract. This has been fixed. (CRM - 144855)

Online: An error occurred when attempting to view an Account Sales Report due to a query formatted for the Windows 8 and 10 platform instead of the Online platform. This has been fixed. (CRM - 145502)

Medical

iPad: Validation did not work correctly after changing the record type on a Key Medical Insights record. This has been fixed. (CRM - 144656)

Multichannel

MC: An empty WHERE clause was converted to {}, causing validations on the the Engage Admin page to fail. This has been fixed. (CRM - 145736)

MC: An error occurred when updating or uploading CLM documents with the Multichannel Loader. This has been fixed. (CRM - 146029)

Network Integration

Online: Accounts with a status of Undetermined did not return in the Network Account Search. This has been fixed. (CRM - 144180)

Suggestions

iPad: An error occurred where Suggestions records were not displaying when the Expiration Date Field was empty. This has been fixed. (CRM - 146142)

Sync

iPad: When the incorrect account ID type was being processed in sending an Approved Email, errors for the transactions following were not reported correctly in Activity logs. This has been fixed. (CRM - 145348)

Note

Maintenance items in the Veeva application are typically corrections to existing functionality. All new features and enhancements to existing features are normally available in major releases.
