

## **Veeva CRM Maintenance Release Notes -- 182.9.0**

### **Account Management**

iPad: The Document tab did not display for some users. This has been fixed. (CRM-152179, CRM-152926)

iPad: Long business professional account names were truncated. This has been fixed. (CRM-153472)

iPad: The text counter on the First Name field did not function correctly. This has been fixed. (CRM-153981)

### **Approved Email**

iPad: Error messages on required fields were not cleared after the necessary information was added. This has been fixed. (CRM-153144, CRM-153261)

### **Call Reporting**

iPad: After trying to save and encountering error messages multiple times, error messages continued to display after the user canceled out of editing the record. This has been fixed. If the user deletes the record, the issue still exists. This will be fixed in the next patch. (CRM-149525)

iPad: Product names in the Detailing Priority section of Call Reports were truncated. This has been fixed. (CRM-153033)

iPad: Selecting the Manage Attendees button caused an error. This has been fixed. (CRM-153290)

iPad: After deleting multiple items from the Calls related list, users could scroll through the list but could not open a call. This has been fixed. (CRM-153612)

iPad: Custom fields in the Expense section did not display on the call report. This has been fixed. (CRM-153648)

iPad: Performance was affected when a call contained 25 or more unique attendees. This has been fixed. (CRM-153683)

iPad: When only one product existed in My Setup, product discussion records were not created automatically. This has been fixed. (CRM-153761)

### **Call Sampling**

iPad: Addresses were misaligned on the Ship To Address popover. This has been fixed. (CRM-146650)

iPad: Some sample information was obscured, and the disclaimer did not display fully on the signature page. This has been fixed. (CRM-153185)

Online: Colors for My Schedule did not match between the Online and iPad platforms. This has been fixed. (CRM-153663)

iPad: Values did not display in the Promotional Items picklist. This has been fixed. (CRM-153949, CRM-154214)

### **Call Scheduling**

iPad: Users could not create a Time Off Territory event when the Time Off Territory object contained multiple record types. This has been fixed. (CRM-153538)

iPad: Selecting the Today link while the Agenda view was scrolling caused an error. This has been fixed. (CRM-153918)

Online: After saving a call, the account name text changed to white. This has been fixed. (CRM-154171)

### **CLM**

iPad: Downloaded presentations did not display in the Media library. This has been fixed. (CRM-148398)

Windows 8 and 10: After viewing the same survey under several different presentations, not all survey questions displayed. This has been fixed. (CRM-153013)

iPad: The Training tab did not display when the HIDE\_CLM\_THUMBNAI LS\_IN\_ALL\_DIR\_VIEW\_vod setting was enabled. This has been fixed. (CRM-153186)

MC: Some custom field values were not mapped to Key Messages. This has been fixed. (CRM-153382)

### **Concur Sync**

Online: Selecting the Concur Admin tab displayed an error. This has been fixed. (CRM-153516)

### **Consent Capture**

iPad: Users could not add or edit email addresses when capturing consent. This has been fixed. (CRM-152626)

iPad: The Subscribe All and Unsubscribe All buttons displayed when they were configured as disabled. This has been fixed. (CRM-152764)

iPad: The Request Receipt check box displayed as read only. This has been fixed. (CRM-153086)

### **Cycle Plans**

iPad: The Cycle Plan name and dates overlapped. This has been fixed. (CRM-153222)

iPad: When switching plans on the Targets tab, an error occurred. This has been fixed. (CRM-153878)

iPad: The attainment percentage did not display on the My Cycle Plan widget. This has been fixed. (CRM-153974)

### **Engage Meeting**

iPad: The Engage Meeting Name field did not display. This has been fixed. (CRM-153555)

iPad: The iOS status bar displayed at the top of CLM presentations, preventing information at the bottom of the slide from displaying. This has been fixed. (CRM-154124)

### **Events Management**

iPad: Lookups appeared blank on Events. This has been fixed. (CRM-153698)

iPad: The Create button on the Expense page was unresponsive. This has been fixed. (CRM-153984)

### **Expenses**

iPad: Some fields did not display in the Expense section of a call report. This has been fixed. (CRM-153648)

## Home Page

iPad: The Cycle Plan widget was labeled as the percent Remaining instead of Expected Attainment. This has been fixed. (CRM-153022)

## Inventory Monitoring

iPad: Editing an Inventory Monitoring record deleted the associated call. This has been fixed. (CRM-153107)

## MCCP

MC: During the MCCP scheduled process, an error occurred, and the calculation process did not run. This has been fixed. (CRM-153284)

iPad: Users could not navigate away from a Target Detail page. This has been fixed. (CRM-153359, CRM-153193)

iPad: Selecting My Plan from an Account page opened from an MCCP displays the Account Detail page. (CRM-153374)

## Medical Events

iPad: A default value did not display in the Status field on an Event Attendee record. This has been fixed. (CRM-148278)

iPad: If the user did not have access to any record types, an error occurred when syncing Medical Event records. This has been fixed. (CRM-153218)

iPad: The Medical Events tab performance was very slow. This has been fixed. (CRM-152553)

## Medical Inquiries

iPad: Users could not create a Medical Inquiry from the View Related Accounts list. This has been fixed. (CRM-152854)

iPad: When a signed Medical Inquiry was cancelled, the record remained in the related list but was not synced during incremental syncs. This has been fixed. (CRM-153980)

iPad: Medical Inquiries created after launching media did not successfully sync. This has been fixed. (CRM-154169)

### **MyInsights**

Online: Reports could not be generated from files processed on a previous build version. This has been fixed. (CRM-152466)

### **Suggestions**

iPad: Users could not close the Send Email page when sending an Approved Email from a Suggestion. This has been fixed. (CRM-153366)

### **Surveys**

iPad: After saving a survey from the Account Survey Target related list and navigating to the Timeline, an error occurred. This has been fixed. (CRM-153905)

iPad: After saving a survey target and selecting the Calendar tab, previously scheduled calls did not display in the Calendar, and users could not navigate away from the Calendar page. This has been fixed. (CRM-153906)

### **Sync**

iPad: The MI error log is unresponsive instead of displaying the MI Detail page. This has been fixed. (CRM-153758)

iPad: Selecting an item from the Sync Errors list displayed the error only briefly, preventing users from reviewing the error information. This has been fixed. (CRM-145767)

### **Other**

iPad: After submitting a new survey and going to an Account MyInsights dashboard, an error occurred. This has been fixed. (CRM-154221)

### **Note**

Maintenance items in the Veeva application are typically corrections to existing functionality. All new features and enhancements to existing features are normally available in major releases.
