

Veeva CRM Maintenance Release Notes -- 182.9.10

Approved Email

iPad: The email opt-in disclaimer text did not wrap, preventing it from fully displaying. This has been fixed. (CRM-154800)

Call Reporting

iPad: When a user entered an expense on a call, a rounding miscalculation caused some values to be rejected. This has been fixed. (CRM-154983, CRM-155034)

CLM

MC: CLM-Vault integration expired approved shared resource Key Messages when the shared resource had a newer version in a non-steady state. This has been fixed.

Customers must perform an incremental sync on the offline device to correct the shared resource state. (CRM-154937)

Engage Meeting

iPad: Scheduled Engage Meetings could not be started after saving the call report. A camera icon displayed on the call report, indicating a meeting was not scheduled. This has been fixed. (CRM-152235)

HTML Reports

iPad: The `getDataForCurrentObject()` function did not always work with the HTMLReport keyword. This has been fixed. (CRM-154493)

Network Integration

Online: Child accounts were not imported from Network when Network Address Inheritance was enabled. This has been fixed. (CRM-154911)

Note

Maintenance items in the Veeva application are typically corrections to existing functionality. All new features and enhancements to existing features are normally available in major releases.
