

Veeva CRM Maintenance Release Notes -- 183.13.0

Approved Email

Windows 8 and 10: When an account was globally opted out of Approved Email but opted in through a custom channel, users could send Approved Emails to the account. This has been fixed. (CRM-169594)

Call Reporting

iPhone: Hyperlink text displayed incorrectly on the Call screen. This has been fixed. (CRM-167617)

CLM

MC: CLM presentations with more than 250 slides had one slide duplicated when synced from Vault. This has been fixed. (CRM-167545)

Consent Capture

Windows 8 and 10: The incorrect Consent Capture status displayed when the Approved Email and at least one custom channel shared the same channel source. This has been fixed. (CRM-169129)

CRM

iPad: Offline lookups filtered using address fields returned search information slower than usual for users with more than 10,000 addresses. This has been fixed. (CRM-164283)

Engage Meeting

iPad: The orange Meeting Options button was occasionally unresponsive and did not display after a user selected it. This has been fixed. (CRM-166408)

Online: A five-digit Remote Meeting ID was stamped in the Veeva_Remote_Meeting_Id_vod field for non-unique group calls. This has been fixed. (CRM-169623)

Online: A message indicating attendees had not been invited to an event displayed after the Engage Meeting invitation was sent. This has been fixed. (CRM-169722)

Infrastructure

Online: Nitro sync to iPad took longer than usual to complete. This has been fixed. (CRM-168407)

Multichannel

MC: Users could not run CLM-Vault Integrations because of a database connection leak. This has been fixed. (CRM-168094)

Sync

Online: Batches of more than 10,000 records were downloaded during Nitro sync. This has been fixed. (CRM-169453, CRM-169381)

Note

Maintenance items in the Veeva application are typically corrections to existing functionality. All new features and enhancements to existing features are normally available in major releases.
