

Veeva CRM Maintenance Release Notes – 191.10.0

Account Management

iPad: The View Account button displayed on the Account Hierarchy screen. This has been fixed. (CRM-163355, CRM-171961)

iPad: When adding address details in a DCR, an error occurred. This has been fixed. (CRM-170127)

iPad: The Key message column did not display in the Mass Email section of the Timeline. This has been fixed. (CRM-171682)

iPad: Timeline View panels displayed in the incorrect order. This has been fixed. (CRM-171884)

Online: Different error messages displayed in the User and Admin views for the same validation rule. This has been fixed. (CRM-171917)

iPad: All picklist values displayed regardless of the associated record type. This has been fixed. (CRM-171926)

Windows 10: Users could not revert the Product Ratings field to its default status. This has been fixed. (CRM-172075)

iPad: The Role_vod field did not display on the New Affiliation popover. This has been fixed. (CRM-172279)

iPad: The Back button did not display correctly on the My Account tab. This has been fixed. (CRM-172560)

Windows 10: Duplicate products displayed in the Ratings tab on the Account Detail screen. This has been fixed. (CRM-172613)

Windows 10: Users could enter non-numeric characters in a numeric field on the Account Detail screen's Ratings tab. This has been fixed. (CRM-172615)

Approved Email

Windows 10: The first letter of email addresses were automatically capitalized in new emails, spellcheck was enabled, and the character counter displayed incorrect values. This has been fixed. (CRM-171560)

iPad: Email templates were not available from medical events unless the associated approved document was in Approved status. This has been fixed. (CRM-172093)

Online: After selecting the Enable Scheduled Email Processor check box, the selection was not saved. This has been fixed. (CRM-172266)

Online: The restricted word exact-string match displayed errors for words that were not restricted. This has been fixed. (CRM-172972)

Call Reporting

Online: CLM Key Messages displayed Online for calls originating on the iPad platform. This has been fixed. (CRM-169394)

iPad: Opening a call on an iPad that was submitted from another device caused Key Messages to display multiple times. This has been fixed. (CRM-169540)

Windows 10: Users could not scroll through available key messages. This has been fixed. (CRM-172606, CRM-173084)

iPhone: GPS coordinates were not captured after recording a call. This has been fixed. (CRM-171953)

Call Sampling

iPhone: In the Ship To Address field, long location names overlapped with the street address. This has been fixed. (CRM-172377)

iPad: Samples displayed in an inconsistent order. This has been fixed. (CRM-173588)

Call Scheduling

Windows 10: The Call popover on the My Schedule Week View screen displayed the account name for accounts out of the user's territory. This has been fixed. (CRM-168831)

Online: A blank scheduling option displayed in the My Schedule Week View. Selecting the option opened a new call. This has been fixed. (CRM-171804)

CLM

iPad: When the directory filter was set to CLM presentations, the My Presentations screen also displayed those presentations. This has been fixed. (CRM-173058, CRM-173181)

Consent Capture

Windows 10: When editing multiple channel sources, the changes for one channel source were not saved. This has been fixed. (CRM-169665)

iPad: After editing a channel source, lines displayed for a different channel that was globally opted out. This has been fixed. (CRM-171163)

Windows 10: Changes to fields not added to a page layout were not saved after a user exited the Consent Capture screen, edited another channel source, and reopened the screen. This has been fixed. (CRM-171457)

iPad: Collapsed Content_Type_vod channel lines displayed when another channel source was edited. This has been fixed. (CRM-172312)

iPad: Consent was not updated on the Consent Capture screen when a valid opt-in MC consent record existed. This has been fixed. (CRM-172729)

Windows 10: The Korean translation of the Signature field label was truncated. This has been fixed. (CRM-172362)

iPad: Multiple selections displayed after toggling a Consent pill more than once. This has been fixed. (CRM-173532)

Events Management

iPad: An incorrect number format displayed for some locales when saving an expense, resulting in an error. This has been fixed. (CRM-171727)

Online: A sync error for all attendees displayed after adding attendees using multi-select functionality when one of the records failed due to a validation error. This has been fixed. (CRM-172284)

Windows 10: When a user entered description data for an attachment on a connected object's related list, the data was not saved online. This has been fixed. (CRM-172484)

Home Page

Windows 10: A Future widget displayed on the home screen. This has been fixed. (CRM-172370)

Infrastructure

Online: Clearing the Veeva Cache repeatedly caused a time out error. This has been fixed. (CRM-172164)

MC Cycle Plans

iPad: The Segmentations tab did not consistently display. This has been fixed. (CRM-171191)

MyInsights

Online: Users could not connect using FTP, preventing MyInsights data from uploading. This has been fixed. (CRM-173195)

Order Management

Windows 10: Users could not enter values in editable order line fields, other than quantity, from the Product Selector. This has been fixed. (CRM-171979)

Windows 10: The quantity did not save for the second product added to an order. This has been fixed. (CRM-171990)

Windows 10: Bundle pack names were added to order lines, but no products were added. This has been fixed. (CRM-172119)

Windows 10: Users could confirm a product quantity by selecting the product name. This has been fixed. (CRM-172132)

Windows 10: Selecting the v button generated an incorrect number of free goods for an order. This has been fixed. (CRM-172485)

Push Notifications

Online: An error occurred when running a push notification job. This has been fixed. (CRM-172786)

Surveys

Windows 10: The Start Date and End Date values on the Survey Target tab did not match the dates on the Survey Overview screen. This has been fixed. (CRM-172509)

Sync

iPad: For some users, Forced_Full_Sync_vod syncs were initiated when the Forced Full refresh check box on the User object was not selected. This has been fixed. (CRM-172278)

Windows 10: The queryVDSRecords method returned a number value as a string. This has been fixed. (CRM-172541)

Note

Maintenance items in the Veeva application are typically corrections to existing functionality. All new features and enhancements to existing features are normally available in major releases.
